

AI Sales Agent Requirements – Systematic IT Solutions

Project Objective

Develop an AI-powered Sales Agent that will be integrated into our website and work as a **24/7 virtual sales representative**. The AI should understand our services, answer customer questions, qualify leads, recommend suitable services, and convert visitors into qualified leads or booked meetings.

In addition to acting as a sales agent, the AI should be capable of **operating and navigating the website autonomously** on behalf of visitors. It should guide users through the website, open relevant pages, display services, portfolios, pricing information, blogs, and contact forms, assist users in filling out forms, initiate bookings, and complete website interactions without requiring visitors to manually browse the website.

Website: <https://systematicitsolutions.com/>

Company Services

The AI must fully understand and sell our services, including:

- Search Engine Optimization (SEO)
- Local SEO
- Google Business Profile (GMB) Optimization
- Technical SEO
- Website SEO
- Link Building
- PR Outreach
- Web Design
- WordPress Development
- Shopify Development
- Custom Website Development
- E-commerce Development
- Digital Marketing
- PPC / Paid Advertising
- Social Media Marketing
- Content Marketing
- Graphic Design
- Branding & Logo Design
- Email Marketing

The AI should continuously learn and understand all service details available on the website and use this knowledge while interacting with visitors.

AI Capabilities Required

1. Human-like Conversation

The AI should:

- Communicate naturally and professionally.
- Understand customer intent.
- Maintain conversation context.
- Answer follow-up questions accurately.
- Handle objections professionally.
- Respond instantly 24/7.

2. Autonomous Website Navigation & Operations

The AI should actively operate the website for visitors by:

- Navigating between website pages automatically.
- Opening relevant service pages based on customer intent.
- Showing portfolios, case studies, testimonials, blogs, and service pages.
- Guiding visitors through the complete website.
- Filling inquiry and contact forms using visitor-provided information.
- Booking meetings directly from the website.
- Directing visitors to the most relevant services.
- Recommending additional services where appropriate.
- Completing website interactions without requiring visitors to manually navigate the website.

The goal is for visitors to interact primarily with the AI instead of manually browsing the website.

3. Service Recommendation

After understanding the client's business, the AI should recommend the most suitable services.

Examples:

- Local Business → Local SEO + Google Business Profile Optimization
- E-commerce Store → Shopify Development + SEO + PPC
- New Startup → Website Development + Branding + SEO
- Existing Website with Low Traffic → SEO Audit + Website SEO

4. Lead Qualification

The AI should collect:

- Full Name
- Company Name
- Email Address
- Phone Number
- Website URL
- Business Industry
- Required Services

The AI should automatically classify every lead as:

- Hot Lead
- Warm Lead
- Cold Lead

5. Appointment Booking

The AI should allow visitors to:

- Request a callback
- Direct jump to call

The appointment system should integrate with Google Calendar or Calendly.

6. Knowledge Base

The AI should answer questions related to:

- SEO
- Local SEO
- Google Business Profile (GMB)
- Website Development
- WordPress
- Shopify
- PPC
- Social Media Marketing
- Website Maintenance
- Pricing
- Company Services
- Business Processes
- Project Timelines
- Deliverables

The AI must use the website as its primary knowledge source and continuously reference the latest website content.

7. Sales Behaviour

The AI should:

- Build trust with visitors.
- Ask discovery questions.
- Understand business requirements.
- Explain benefits instead of only features.
- Handle objections professionally.
- Upsell relevant services.
- Cross-sell additional services.
- Encourage visitors to book a meeting.
- Encourage visitors to request a proposal.
- Move every conversation toward lead conversion.

8. CRM & Google Sheets Integration

The AI should integrate with our internal systems to ensure all lead data is captured and managed efficiently.

Required Integrations

- Google Sheets (Automatic Lead Logging)
- Our Custom CRM

The AI should automatically:

- Create a new lead in our Custom CRM.
- Save every lead in Google Sheets.
- Store the complete conversation history.
- Update lead status.
- Assign a lead score.
- Assign leads to the appropriate sales representative.
- Create follow-up reminders.
- Synchronize lead information between Google Sheets and our CRM.

9. Notifications

The AI should instantly notify the sales team whenever:

- A new lead is generated.
- A meeting is booked.
- A proposal is requested.
- A high-value lead is identified.

Notifications may be sent through:

- Email
- WhatsApp
- Our Custom CRM

10. AI Dashboard

The Admin Dashboard should include:

- Total Website Visitors

- AI Conversations
- Leads Generated
- Conversion Rate
- Meetings Booked
- Popular Services
- Frequently Asked Questions
- AI Performance Analytics
- Lead Status Tracking
- Sales Performance Reports

11. Multi-language Support

The AI should support:

- English
- All Languages

12. Technical Requirements

The solution should include:

- JavaScript Widget or API Integration
- Mobile Responsive Design
- Fast Response Time
- GPT-powered Conversational AI
- Secure API Integration
- Conversation History
- Live Human Agent Handover
- Secure Data Storage
- Easy Knowledge Base Updates
- Scalable Architecture
- Real-time Website Navigation and Interaction
- Ability to operate website elements on behalf of users

Primary Goal

The AI should function as an experienced **Digital Marketing Sales Executive** capable of:

- Understanding customer requirements.
- Explaining our services professionally.
- Recommending the most suitable solutions.
- Building customer trust.
- Qualifying leads automatically.
- Operating and navigating the website on behalf of visitors.
- Guiding visitors through the complete customer journey.
- Booking appointments.
- Capturing and storing all lead information.
- Integrating with our Custom CRM and Google Sheets.
- Increasing website engagement.
- Improving lead conversion rates.
- Helping close more sales automatically 24/7 with minimal human intervention.
